**Phone:** 704-517-2732

## **CAREER OBJECTIVE:**

Innovative Software Developer with a passion for learning new and useful technologies to benefit client side users and user experiences. I have experience in building clean responsive web applications using React and Vue.

## **TECHNICAL SKILLS:**

**Programming:** HTML5, CSS3 , JavaScript , Node.js

**Frameworks & libraries:** React.js, Vue.js, Vuex, Express, SASS, SCSS

**Databases:** MongoDB, MySQL

**Task Automation & build tools:** Webpack, bash scripting

**Development Tools:** Git, Github, Babel, VSCode , Prettier

## **EXPERIENCE:**

Road To Hire, Charlotte, NC June 2019 – Present

### **Apprentice Software Engineer**

- Worked on developing a unique Front End portfolio using front end technologies
- Built an e-commerce web application using React.js and MongoDB.
- Collaborated with other developers to build a Road to Hire clone via React
- Used Express.js to setup API endpoints for the front-end of the e-commerce web app to consume.
- Implemented use of state and props to make reusable components across e-commerce app and road to hire clone.

TONE, Remote - Washington DC Jan 2016 – November 2016

### **Front End Engineer**

- Worked on developing responsive front-end following material design guidelines using HTML5 and CSS3.
- Collaborated with a team of developers to build a responsive single page application to consume our Node.js REST API.
- Worked with a team of developers to scale, refactor and maintain our Node.js Rest API.
- Used Express.js to setup API endpoints for the front-end of the application to consume.
- Implemented use of AngularJS to make reusable directives used throughout the application.

## **Education :**

High School Diploma, James Madison High School.
